

# MUSHROOM CULTIVATION TRAINING

## BETHUADAHARI COLLEGE

BETHUADAHARI NADIA

Six months is the scheduled time for mushroom cultivation training:

We have taken twenty two classes in six months (twenty six weeks) to teach mushrooms farming among our college students. We have arranged 4 exams for the students.

TOTAL MARKS: 60

THEORY MARKS: 20

PRACTICAL: 40

The syllabus for mushroom cultivation is given below:

1. To give a fair idea about mushrooms among students.
2. Concepts about the environment and the house suitable for mushrooms.
3. Introduction with the necessary materials for this cultivation among the trainee students.
4. To cultivate mushrooms, we must first learn how to build a house.
5. Students should be taught to cut, soak and clean the straws or hays to be used for mushroom farming.
6. Students will be taught to packaging straws and mushrooms seeds.
7. To teach how to hang the packets containing mushroom seeds in the appropriate room.
8. After eighteen days water should be supplied in the packets of mushrooms as needed and monitored on these thereafter.

### Resolutions taken by Board of Studies:

For six months training period, we have entered into a contract with a private company in Asansol(MPG E Business Private Limited) to make students self- reliant at our Bethuadahari College. We must take at least four classes in one month during the six months schedule time for student's training. We must distribute training certificates among the students of Bethuadahari College after completing the training period and the examination procedure. We are applying that after completing the six months training; we will evaluate the students correctly and distribute the certificates on the basis of the student's result. Minimum pass mark is thirty.
