ABOUT THE THEME

Impact of COVID 19 on labour migration has become one of the most burning issues in this pandemic situation. In this twenty-first century when we dream of a developed India, the number of migrant workers is not ignorable at all. India's nationwide lockdown amidst the COVID 19 pandemic has severely affected its migrant population. This COVID 19 has not only raised an insecurity regarding their health issue but also regarding food shelter, economic crises etcetera. Government's response towards the emotion of these labours is surely not fully satisfiable. They are facing harassment from government and getting negative reactions from the local communities also. The anxiety and fear they are carrying with them also have shaken the foundation of their electoral psychology. Therefore, the webinar has two major objectives:

- To discuss development and migration.
- To critically analyse the electoral psychology of the migrant labours in this pandemic situation.
